

I feel very strongly about my family's right to privacy, especially in our own home. Any attempt to weaken telephone privacy laws is an invasion of our rights. Please do not allow companies to break this barrier that we are working so hard to protect. Businesses have every right to advertise their product and services; however it is offensive when it is in the form of unsolicited telemarketing. Members of the CBA should not have the right to call me or my family unless it is directly associated with my business activities within those organizations. Please take this into consideration when making your decision. Thank you.
